

### How does it work ?

Solid and liquid waste are first separated inside the system.

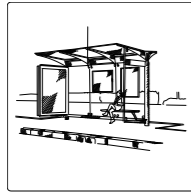

A constant air flow partially evaporates the liquids and dehydrates the solids, working to reduce odours.

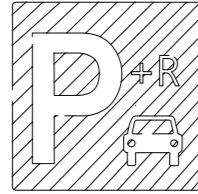

### Ideal for :

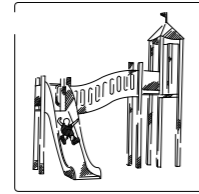

Allotments

Bus stops

Parking

Playground

Seaside

Hiking trails

Public Gardens

### Our customers trust us

“Kazuba meant we could equip our golf course with toilets whilst avoiding large scale construction works and associated costs. Our players really appreciate them and use them as they would any other toilet.”

*J.Badea, Golf de Servanes*

“For a long time our community requested such a facility and this solution was made to measure for the location”

*Pierre Signorini, Caslano, Switzerland.*

## The KL1 range

Roofing in composite panel available  
Large choice of colours

Perfect for sites with low or medium footfall, the KL1 cabin is designed to be easily put together with a minimum of tools. The cabin can be assembled by two people in a couple of hours.

The KL1 has been installed at numerous golf courses, camp sites, adventure parks, etc

## The KL2 range

A contemporary design, the KL2 looks good in both urban and natural settings alike.

Thanks to its modularity and robustness it has become our most popular model for more than 10 years. The KL2 is available in 3 versions: standard, adapted for persons with reduced mobility and with urinal annex.

## The KL3 range

Roofing in composite panel available  
Large choice of colours

The design of the KL3 is especially adapted to regions with heavy snowfall.

Adapted for persons with reduced mobility, the KL3 range is very much appreciated by ski resorts and regions with demanding climates (Saint Pierre et Miquelon, Québec, ...).
